Professional Summary

Computer Science undergraduate with foundations in Java, data structures, and problem-solving, aspiring to build a career as an AI Engineer specializing in Generative AI and Agentic AI. Experienced in developing full-stack applications with FastAPI and React, and integrating RAG, LLM APIs, and AI-driven workflows into real-world solutions. Passionate about building intelligent, scalable applications and exploring autonomous AI systems.

Education

KPR Institute of Engineering and Technology, Coimbatore	2023 – 2027
B.E. Computer Science and Engineering	CGPA: 8.33 / 10
THE TVS SCHOOL, Madurai	2021 – 2023
Higher Secondary Education	91.16%

Skills Summary

- **Languages:** Java, Python, JavaScript
- **Concepts:** DSA, OOP, DBMS, CN, OS
- **AI/GenAI:** LLMs, RAG, Agentic AI, LangChain, LangGraph, ChromaDB
- **NLP/Transformers:** NLTK, spaCy, BERT, HuggingFace
- **Machine Learning:** Scikit-learn, PyTorch, TensorFlow, Feature Engineering
- **Database & Backend:** MySQL, PostgreSQL, FastAPI
- **Tools/Platforms:** Git, GitHub, Linux, Postman, n8n

Internship Experience

Full Stack Intern	Apr 2025 – Jun 2025
Tita Technologies (Remote)	

- Built dynamic frontend components using React, focusing on usability and clean interface design.
- Integrated backend APIs using Node.js and Express to enable smooth data flow between client and server.
- Implemented CRUD operations using MongoDB and MySQL as part of core application features.
- Improved backend logic and code structure, making the application more efficient and easier to maintain.

Projects

FinTech CRM: Loan Management Platform

- Developed a live, client-facing FinTech CRM for managing loan leads across multiple branches, with separate branch-wise dashboards, team assignments, lead stages, and centralized customer tracking.
- Designed and implemented a configurable lead management workflow covering lead creation, assignment, status progression, conversion tracking, customer onboarding, document management, and loan-specific operations based on client requirements.
- Integrated OAuth-based authentication, REST APIs, database operations, and document handling to provide secure role-based access and reliable data management across branches, while optimizing the dashboard for efficient lead tracking and operational visibility.

Agentic AI Talent Intelligence Platform

- Developed a multi-agent AI platform that analyzes resumes and job descriptions to perform intelligent candidate-job matching using LLMs, vector search, and skill-based ranking.
- Built a Retrieval-Augmented Generation (RAG) pipeline using FastAPI, ChromaDB, and transformer models to improve contextual recommendations and reduce irrelevant matches by 35%.
- Implemented semantic search and ranking over candidate profiles, decreasing search response time by 40% compared to traditional keyword-based retrieval.

Certifications

- **Red Hat Certified System Administrator (RHCSA – 2025)**
- NASSCOM Certified Linux Administrator for Datacenter (2025)
- NPTEL-Natural Language Processing(2024)
